I'm a location sound recordist with twenty years of experience predominantly in documentary. I've travelled extensively, working overseas in many locations and environments. I am particularly interested in working in challenging locations, where my love of the outdoors and travel compliment my work.

I'm enthusiastic and easy going and work with a strong sense of professionalism but also a good sense of humour.

I own and operate my own equipment, which I constantly updated so am able to use the latest, and greatest gear to deliver the best possible results with the minimum of fuss; often in some of the most arduous of conditions across the world.
